-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8, 9, and 11-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Skrabal. In figure 16, for example, Skrabal shows a device including an access structure, needle 2, connected to a measuring device that houses a removable and replaceable sensor 10, where the body fluid to be analyzed is supplied to the sensor 10 through the needle to an outlet of the needle connected to an inlet of the body, and insulin is supplied from an outlet of the body into an inlet of the needle and back into the human body. As such, the device is an infusion set. In addition, the record has no definition of what constitutes a dialysis probe. It is the examiner's position that since Skrabal meets all the claimed structure, it too is a dialysis probe.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10, 19, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Skrabal in view of Say. Say shows the same type of device as Skrabal, where there is a check valve 44 for preventing flow of fluid from the sensor

back to the needle. Hence, it would have been obvious to modify Skrabal to include such a valve, so as to control the fluid flow and maintain accurate readings.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pfeiffer shows a micro-dialysis probe similar to the present invention.

Mostl shows another similar probe to the present invention.

Krivitski et al shows a device that has a sensor on the outlet of a dialysis system.

Gowda shows an access device with a removable sensor attached thereto.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert L. Nasser whose telephone number is (703) 308-3251. The examiner can normally be reached on Mon-Fri, variable hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (703) 308-3130. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
